

Ice Princess

Crassula x justicorderoyi

- I'm a gorgeous hybrid succulent with narrow, textured leaves that range in color from green to gold, then become reddish in intense sunlight.
- With proper care, I'll grow beautiful stems with clusters of light pink flowers mid-summer!
- Like other crassula, I can withstand intense sun but am susceptible to over-watering. Water me once a month in wintertime, and every 10 days in summertime.
